

CONFERENCE AGENDA INTERTRAFFIC INDONESIA
06 – 08 November 2019
Jakarta International Expo, JIEXPO

Indonesia has been increasing their awareness of the importance of developing "Smart City" in all of its regions. "Smart City" is the key to the economic and social growth of a region. Integrated development, interconnected transportation, the ability to travel efficiently from one point to another, a sense of safety and security are the measure of the success of a smart city development.

Indonesia as a country consist of various cities and their problems offer major business opportunities for suppliers. The Indonesian government has been focusing to speed up the development of connectivity and mobility access to boost the country's economic growth.

Intertraffic Indonesia 2019 co-located with Indonesia Infrastructure Week (IIW) and Konstruksi Indonesia will serve as a platform for experts within the infrastructure and traffic industry to gather, do business and present solutions that improve business and economic growth in Indonesia.
