

“INDONESIA INCORPORATED @ RAKERNAS - KADIN BIDANG KONSTRUKSI DAN INFRASTRUKTUR”

TOPIC DISCUSSION / DIALOGUE

- Strengthening the National Construction Industry through cooperation between State Owned Enterprise (BUMN) & Local-Private construction company.
- Revive the local-private construction business by streamlining State Owned Enterprise (BUMN).

BACKGROUND

Throughout the first period of presidency Jokowi, he has built 947km of toll roads, 3,432km of highways, 39km of bridges, 10 new airports, 19 ports, and 17 dams, among other things. However, BUMN dominance is pushing the private sector to the side-lines of the domestic construction industry. Without a healthy private sector presence, what would remain is a smaller number of mostly state-owned companies competing for the same pool of potential projects. There may be some private companies left—presumably those with large capital or strong political connections. This is a market friction that will not in any way encourage healthy competition and good corporate governance. Companies would have less incentive to improve project quality or drive down tender prices—yet they would still be assigned projects anyway.

Wednesday, 6th November 2019
Conference Room 1, Hall D

Waktu	Sesi 1 "Meningkatkan utilitas infrastruktur melalui aksesibilitas serta konektivitas jaringan infrastruktur menuju kawasan wisata"
13.20 – 13.25	Kata Sambutan: Erwin Aksa, Wakil Ketua Umum Bidang Konstruksi & Infrastruktur, Kamar Dagang dan Industri Indonesia (KADIN)
