and Housing

BACKGROUND INFORMATION INDONESIA INFRASTRUCTURE WEEK (IIW 2016) - CONFERENCES

At the heart of the annual IIW, immediately following the ASEAN G2B-IIF and the IIW Opening Ceremonies are four vertical industry conferences running for 2 days on 9th-10th November, with ASEAN Economic Keynotes that will focus on; **Infrastructure, Construction, ICT and Airports.**

These conferences have been designed to complement the IIW exhibitions, where last year over 13,500 trade visitors and over 900 conference delegates collectively developed over USD \$9.6 Billion of deals done on site.

The conferences each provide central and regional governments, state owned enterprises, industry leaders, project stakeholders, global investors and technology service providers, the full spectrum of platforms available to share knowledge, deliver policy, open dialogue and showcase new technologies in key areas that will accelerate Indonesia's critical national infrastructure. For further information on any of the conferences, please click on the links below for;
